Q: Circular Explanation Can someone explain to me how this works? I've tried to search everywhere for this, but most results talk about the first and second slides being circles. I'm trying to understand the third, but I can't figure out what they mean by "e", "g" and "n" being drawn from the bottom, or what "r" means in the "1". A: It's describing the various size of radiuses at which each line or circle intersects the circle. They are marked with red dots, which show the circle's circumference. So in your case "e" is intersecting the bottom circle at the circumference between lines 1 and 2, "g" and "n" are intersecting the bottom circle at the circumference between lines 1 and 3, and "r" is intersecting the bottom circle at the circumference between lines 2 and 3.
