What happens when a volcano has a bad mood? Take a ride down into Mount Ontake, Japan's tallest mountain, and you'll see a smoldering landscape. Just over one year ago, a volcano erupted violently. The result was a surprise eruption, causing

rocks and soil to fly into the air. Many were killed. Now, luckily, we're not looking into the future. Fortunately, we're looking into the past, into the history of this volcano. There's a famous saying in Japan, which we heard on a trip there. When they know too much about a thing, they use that knowledge as a weapon. I love this, and it's true. Take a minute to learn how many children in your classroom have been maimed and killed by guns. Think of that. It's not some distant, far-fetched future that never happens. It's a reality of right now. So, take a second to think about knowledge. Can you identify the approach that they're using here? Can you guess what they're up to? Okay, what about anger? Take a minute and think about all the things that anger you. Of course, you can think of some big ones.
