I'd like to be able to insert a numeric counter so that I can identify submissions with a specific Module. The Symfony documentation suggests that this could be achieved with a View Block. http://symfony.com/doc/current/cookbook/views/disqus.html Are there other ways of achieving this? Are there alternative ways that work with Views - Views 2 perhaps? A: You want to use a field instead of a block. Steps: Create a view where you want to post your webform submissions. In field settings for that view, click 'Add' -> 'Field' Select Field (Integer), select 'Amount of postings' and

configure it under 'Additional settings' -> 'Limit', set to 1 (negative numbers give increments of -1) Create a new view that you will use to display the completed via Original View: Original View View (form) New View (form): View (form) Steps 4-5 will breake up all the other links on your site, so you might want to put a quick redirect like this in your.htaccess: RewriteRule "^/residential/test/(.*)" "http://$1" [R=301,L] Which will help.
