The colors of the original were reproduced in Sega's video game, Hi staly,Here's a line up of trainers that I have modded for my plant and look at them. she is also a trainer for Pokemon! Artificial Girl 3.Metastasis-initiating cells in a model system of human and canine mammary cancer. Metastasis occurs when cancer cells leave the primary tumor and enter circulation. Those cells that remain in circulation give rise to metastases. Circulating tumor cells need to initiate metastasis by invading and/or forming secondary tumors. The latter may be referred to as the metastasis-initiating cells (MICs), as they induce the formation of metastases and are thought to be the mechanistic target of cancer therapies aimed at preventing metastasis. We have used a model system of spontaneous metastasis in human and canine mammary cancer, to study the contribution of MICs to metastasis initiation. In the present report, we describe the isolation of these cells from peripheral blood, their characterization by using flow cytometry and histology, their colonization of bone marrow,
